

Techtextil North America 2019 – Envision. Engage. Evolve.

Techtextil North America is North America's premier trade show for technical textiles and nonwovens, assembling all vertical aspects of the technical textile industry: from research and development, through raw materials and production processes and finally ending in conversion, further treatment and recycling. The event has become one of the leading industry platforms where manufacturers, suppliers, service providers and other textile professionals come together for three days of networking, education and innovation.

The 2019 edition will be held February 26-28, 2019 in Raleigh, North Carolina. The relocation from Chicago to Raleigh brings the show back to the Southeast and the heart of the North American Textile Industry, providing drive-in access for many leading global companies and a close proximity to Raleigh-Durham International Airport.

2019 Show Highlights

Educational Symposium

The highly-acclaimed Techtextil North America Symposium provides attendees the opportunity to listen and learn from industry leaders and subject matter experts as they discuss some of the most pivotal advancements in research and technology and shed light on the current global economic state and its effects across industries. Those who purchase symposium passes will attend sessions on today's hot topics including smart textiles, new fiber developments, advancements in nonwovens, and sessions that will address innovations in textiles for industry-specific applications including medical, aerospace, personal protection and more.

For the first time, Techtextil North America 2019 is offering a la carte pricing, giving visitors the flexibility to pick and choose the sessions most relevant to them, as well as a "Full Experience" option, which includes three-day exhibit hall access, entry into all Symposium sessions, as well as shuttle transportation and entry into the Reception & Tours at NC State.

"The Lab" Testing Demonstration Area

A brand new show floor feature to Techtextil North America, "The Lab" will serve as a demonstration and learning area featuring equipment & technology for textile testing and standards. The curation of participating companies and educational talks is being led by Sam Buff, Director of the Textile Technology Center at Gaston College in conjunction with AATCC, with additional sessions from Datacolor, The Manufacturing Solutions Center, and NCSU's Textile Protection and Comfort Center. Participation in The Lab provides exhibiting companies with opportunities for additional exposure, and gives visitors the chance to experience textile testing first hand, discover new testing methods, and educate themselves on the latest in industry standards.

Student Research Poster Program

The annual Graduate Student Poster Program highlights research done by students from the top textile engineering, manufacturing and finishing programs in the country, and has become a must-visit show floor attraction at Techtextil North America. This year, the newly renamed Student Research Poster Program has been expanded to include undergraduate students, in addition to those pursuing their Master's or Ph.D. The program provides students from around the world with a platform to share their research findings with peers, potential employers, and sponsors. Select participants will also have the chance to present their research in front of a captive audience during the three days of Tech Talks, which will be located on the show floor and will once again be powered by The Nonwovens Institute.

After-hours Reception & Tours at North Carolina State University's College of Textiles

Techtextil North America and North Carolina State University's College of Textiles will co-host an evening of education and exploration, taking place on Wednesday, February 27th from 6:00-8:30 pm at The College's building on NC State's Centennial Campus. Ticketholders will enjoy light hors d'oeuvres and drinks while networking with other show attendees in an open-house style reception, and have the opportunity to meet and greet with students and faculty and view current projects and research studies as they tour the top-of-the-line laboratories and fabrication facilities. Guided tours of The Nonwovens Institute will also be taking place, with a limited number of spots available. Tickets are currently available as an add-on to all registration types, and may also be purchased on-site at registration for an increased price, availability permitting.
